MARKED-UP COPY OF AMENDED CLAIMS

65. (Amended) [A.] A computer-implemented method for generating a hardware implementation of graphical code, the method comprising:

creating a graphical program, wherein the graphical program includes a plurality of interconnected nodes, wherein the interconnected nodes visually indicate functionality of the graphical program, wherein the graphical program implements a measurement function;

generating a hardware description based on the graphical program, wherein the hardware description describes a hardware implementation of the graphical program, wherein said generating includes generating a hardware description based on the structure node;

configuring a programmable hardware element utilizing the hardware description to produce a configured hardware element, wherein the configured hardware element implements a hardware implementation of the graphical program;

acquiring a signal from an external source after said configuring; and

the configured hardware element executing to perform the measurement function on the signal.
